

Environmental Information Sheet

ATTRAXOR MAPP 18939

A 10% water dispersible granule formulation containing prohexadione, a plant growth regulator for use on managed amenity turf.

Maximum total dose: 6.0 kg product/ha

Section	Profile
<p>1. WILDLIFE</p> <p>Mammals and Birds</p>	<p>Attraxor is not classified as '<i>Harmful to game, wild birds and animals</i>'</p> <p>No risk management necessary to protect wild mammals and birds. Prohexadione is of low toxicity to mammalian and bird species. The risk to wild mammals and birds grazing on treated areas is low as is the risk due to exposure from other routes, e.g. consumption of insects, due to the limited amount of residues likely to be consumed.</p>
<p>2. BEES</p>	<p>No risk management necessary. Attraxor is of low risk to bees.</p>
<p>3. NON TARGET INSECTS AND OTHER ARTHROPODS</p>	<p>No risk management necessary.</p>
<p>4. AQUATIC LIFE</p>	<p>Attraxor is not classed as "<i>Harmful to aquatic organisms</i>".</p> <p>Attraxor is of low toxicity to fish, and aquatic invertebrates, e.g. water flea and of moderate toxicity to algae.</p> <p>No risk management necessary. However care should always be taken to ensure that surface waters or ditches are not contaminated through spillage or with the used container.</p> <p>Not categorised under the LERAP scheme.</p>

Environmental Information Sheet

ATTRAXOR MAPP 18939

Section	Profile
<p>5. SOIL and GROUNDWATER</p> <p>Earthworms</p> <p>Soil Micro-organisms</p>	<p>No risk management necessary. Prohexadione is impersistent in soil and moderately mobile in soil. Use of Attraxor as recommended presents a low risk to groundwater.</p> <p>No risk management necessary. Prohexadione is of low toxicity to earthworms.</p> <p>No risk management necessary. At the recommended application rate Attraxor has negligible effects on soil microbial respiration and nitrogen turnover.</p>
<p>6. NON-TARGET PLANTS</p>	<p><i>“Avoid spray drift onto neighbouring crops and other non-target plants”.</i></p> <p>When used as recommended Attraxor is not expected to have adverse effects on non-target plants. However, as Attraxor is a plant growth regulator care should always be taken to minimise drift when applying close to field boundaries.</p>

ALWAYS READ THE LABEL: USE PESTICIDES SAFELY

Care must be taken to minimise the risk of surface water contamination from farmyard and field sources.
