

# Sheriff

A proprietary formulation, containing an approved food colourant designed to add colour to seed tuber treatments.

The (COSHH) Control of Substances Hazardous to Health Regulations may apply to the use of this product at work.

## SAFETY PRECAUTIONS

### Operator protection

Engineering control of operator exposure must be used where reasonably practicable in addition to the specified personal protective equipment when handling the concentrate. However engineering controls may replace personal protective equipment if a COSHH assessment shows that they provide an equal or higher standard of protection. Where the personal protective equipment specified on the Sheriff label is different to that specified on any partner product label(s), the highest level of protective equipment must be worn.

## Sheriff

### Warning

**Causes serious eye irritation.  
Harmful to aquatic life with long lasting effects.**

Wash thoroughly after use.  
Avoid release to the environment.  
Wear protective gloves/protective clothing/eye protection/  
protective footwear.  
IF IN EYES: Rinse cautiously with water for several minutes.  
Remove contact lenses, if present and easy to do. Continue  
rinsing.  
If eye irritation persists: Get medical advice/attention.  
Dispose of the contents and/or its container in line with  
regulations on dangerous waste or packaging and waste  
packaging respectively.

**To avoid risks to human health and the environment,  
comply with the instructions for use.**

81170823 GB 2083

## DIRECTIONS FOR USE

Use **Sheriff** at a rate of 2.5% v/v of the total spray solution, e.g.

Total Spray Volume	Volume of Sheriff
40 L	1.0 L
80 L	2.0 L

**Alternatively**, where potato seed treatments (e.g. Honesty®) require 2.0 – 2.4 L of spray solution per ton of potato seed, use 50 mL of **Sheriff** per ton of potato seed, e.g.

Total mass of seed potato to treat (T)	Total volume of spray water (L)	Volume of Sheriff (L)
10 T	20 – 24 L	0.5 L*
20 T	40 – 48 L	1.0 L*

\*equivalent to 2.08-2.50% v/v.

**For Specific Recommendations** contact De Sangosse Ltd (01223 811215) or its appointed distributors.

## Mixing and Application

### Mixing

Follow the instructions for use of the crop protection product that is being used to protect the seed. Ensure application equipment is properly calibrated.

If preparing the spray mixture in a single tank – always add Sheriff last. First add water (half fill or as required on the pesticide label). Then measure the appropriate amount of crop protection product into the tank and agitate. Measure the appropriate amount of Sheriff into the tank and continue agitating until mixed well.

If using a direct injection system contact De Sangosse Ltd or its appointed distributors for advice.

## Trade Mark Acknowledgments

### CONDITIONS OF SUPPLY

All goods supplied by us are of high grade and we believe them to be suitable, but as we cannot exercise control over their storage, mixing or use, all conditions and warranties, statutory or otherwise as to the quality or fitness for any purpose of our goods are excluded and no responsibility will be accepted by us for any damage or injury whatsoever arising from their storage, handling, application or use.

## The following does not form part of the label text.

With many products there is a general risk of resistance developing to the active ingredients. For this reason a change in activity cannot be ruled out. It is generally impossible to predict with certainty how resistance may develop because there are so many crop and use connected ways of influencing this. We therefore have to exclude liability for damage or loss attributable to any such resistance that may develop. To help minimise any loss in activity the BASF recommended rate should in all events be adhered to. Numerous, particularly regional or regionally attributable, factors can influence the activity of the product. Examples include weather and soil conditions, crop plant varieties, crop rotation, treatment times, application amounts, admixture with other products, appearance of organisms resistant to active ingredients and spraying techniques. Under particular conditions a change in activity or damage to plants cannot be ruled out. The manufacturer or supplier is therefore unable to accept any liability in such circumstances. All goods supplied by us are of high grade and we believe them to be suitable, but as we cannot exercise control over their mixing or use or the weather conditions during and after application, which may affect the performance of the material, all conditions and warranties, statutory or otherwise, as to the quality or fitness for any purpose of our goods are excluded and no responsibility will be accepted by us for any damage or injury whatsoever arising from their storage, handling, application or use; but nothing should be deemed to exclude or restrict any liability upon us which cannot be excluded or restricted under the provisions of the Unfair Contract Terms Act 1977 or any similar applicable law.
