

Environmental Information Sheet

CORBEL MAFF/MAPP 00578

An emulsifiable concentrate (EC) formulation containing 750 g/l fenpropimorph (a morpholine fungicide) for the control of various diseases in winter and spring cereals.
Maximum application rate: 1 l/ha (750 g as/ha)
Maximum no. applications: Varies with crop/timings

Section	Profile
1. WILDLIFE Mammals and Birds	Corbel is not classified as ' <i>Harmful to game, wild birds and animals</i> '. No risk management necessary to protect wild mammals and birds. Fenpropimorph, the active substance in Corbel, is of low toxicity to mammals and birds. The risk to wild mammals and birds grazing areas is low, as is the risk due to exposure from other routes e.g. consumption of earthworms or other invertebrates such as insects.
2. BEES	No risk management necessary. Corbel is of low risk to bees.
3. NON TARGET INSECTS AND OTHER ARTHROPODS	No risk management necessary. Corbel is of low risk to a range of arthropod species commonly found in and around treated fields, including lacewings, predatory mites, aphid parasitoids and spiders.
4. AQUATIC LIFE	Corbel is classified as " <i>VERY TOXIC TO AQUATIC ORGANISMS, may cause long term adverse effects in the aquatic environment</i> ". Corbel is highly toxic to fish and aquatic invertebrates, e.g. water flea, and is extremely toxic to algae. " <i>Do not contaminate surface waters or ditches with chemical or used container</i> ". No risk management is necessary. When used according to the label instructions there will not be sufficient contamination of water to present a risk to aquatic life. Not categorised under the LERAP scheme.

Environmental Information Sheet

CORBEL MAFF/MAPP 00578

Section	Profile
5. SOIL and GROUNDWATER Earthworms Soil Micro-organisms	Fenpropimorph is moderately persistent in soil and is strongly absorbed to soil and is therefore not mobile. No risk management necessary. Use of Corbel as recommended is of low risk to groundwater. No risk management necessary. Corbel is of low toxicity to earthworms. No risk management necessary. Corbel is of low risk to soil organisms.
6. NON-TARGET PLANTS	When used as recommended Corbel is not expected to have adverse effects on non-target plants.

ALWAYS READ THE LABEL: USE PESTICIDES SAFELY

Care must be taken to minimise the risk of surface water contamination from farmyard and field sources.
